Adaptive Sport Equipment Grant

The costs of specialized (adapted) equipment for people with a disability in sport is a significant barrier to their participation. This new grant program will assist in the purchase of adapted equipment which meets manufacturer’s qualification standards for disabled sport participation/competition. The following are examples of eligible equipment:

- Wheelchairs adapted for wheelchair athletics, rugby, basketball, etc.
- Hand-cycles and/or other para-cycling equipment
- Goalball nets and balls for blind sports participation
- Sit-skis or similar para-ski equipment adaptations
- Para-sailing equipment
- Sledge hockey sleds and sticks
- Specialized timing or game management equipment such as adapted for blind or hard of hearing athletes.

Adaptive Sport Club Development Grant

The costs of starting new sport clubs for people with a disability at the community level is high. This program is designed to support new developmental programs in communities or the expansion/enhancement of existing programs (e.g. integration of athletes with a disability in programming, new age categories). In either case the goal is to increase participation opportunities for people with a disability. The grant can be used to offset barriers such as facility rental, coach development and transportation. The maximum eligible support is up to $5,000 per year per program application. This program is meant to compliment the Adaptive Sport Equipment Grant program.
